

The starting point for rearing healthy, productive animals is **safe nutrition**.

Active in over 80 countries worldwide, we produce premixes, concentrates, nutritional concepts and functional feed ingredients for the animal feed industry.

We strive to constantly innovate, and at the heart of our unique ingredients are our ongoing research, development and testing programmes. We are widely acknowledged as the industry's benchmark for increasing yields and reducing disease naturally.

Through our worldwide reach, constant innovation, thorough testing and proven results, we are proud to say that, today and tomorrow, Nuscience will remain your knowledge partner in nutrition and health.

product range cattle

Even with balanced rations, it's possible to further improve animal performance by adding functional feed ingredients that promote for example intestinal health or reduce stress, thereby increasing cost-effectiveness. Nuscience Health4U has developed a broad product range based on natural ingredients ensuring healthy well performing animals.

Health4U, innovative solutions for a healthy business

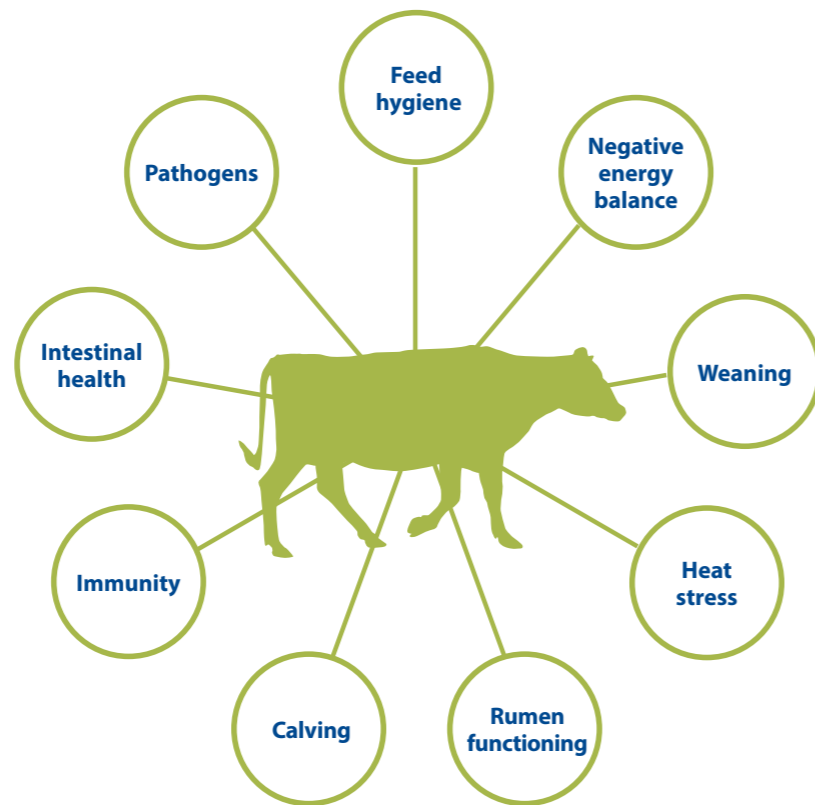

The main objective in modern husbandry should be 'to enhance the animal performance' in a profitable way and at the same time minimising the use of antibiotics. Nuscience helps you to achieve this goal by developing sustainable and economically viable products based on natural ingredients such as Medium Chain Fatty Acids, plant polyphenols, etc. to promote animal health.

Thanks to a vast nutritional knowledge and innovation-driven attitude many of today's most current issues in ruminants can be tackled by Nuscience **Health4U** products. Therefore we are widely acknowledged as the industry's benchmark for increasing yields and reducing disease naturally.

Nuscience **Health4U** products promote intestinal health and help the animal to cope with any form of stress, thereby increasing cost-effective performances.

Challenges for Health4U products

Animals have to cope with several external and internal factors affecting their health and thus performances. Through the **Health4U** products, solutions are offered to tackle these challenges.

Health4U product overview

	Information	Benefits
Aromabiotic Cattle	Carefully balanced mixture of Medium Chain Fatty Acids with unique anti-microbial, physiological and immunological properties.	<ul style="list-style-type: none"> • better technical performances • improved udder health • reduced use of antibiotics • lower risk on rumen acidosis
Rumabiotic	Optimal combination of Medium Chain Fatty Acids and other immunity boosting components.	<ul style="list-style-type: none"> • better general health status • better technical performances • farm pack solution
Vitanox	A powerful natural antioxidant composed of specially selected polyphenolic compounds to reduce oxidative stress.	<ul style="list-style-type: none"> • broad spectrum anti-oxidative capacity • vitamin E sparing effect • improved growth performances
Vitafix	Range of toxin binders for counteracting a wide range of mycotoxins.	<ul style="list-style-type: none"> • adsorbs and inactivates mycotoxins • low affinity for vital elements • temperature and pH stable products
Vitalife	Water soluble supplement of vitamins, trace elements and electrolytes. Easily applicable in the drinking water.	<ul style="list-style-type: none"> • better resistance against disease • support of the intestinal health • fast recovery of diarrhea
Vitalife Cow	Water soluble direct energy support for cows straight after calving.	<ul style="list-style-type: none"> • tasteful direct supply of energy, electrolytes, vitamins and minerals • good absorbable calcium source • stimulates feed intake and milk production after calving
Vita Dairy Boost	Whole milk supplement to provide extra nutrients and nutritional safety to the young growing calf.	<ul style="list-style-type: none"> • provides extra energy, protein, vitamins and minerals • boosts calf immunity and helps to minimize the risk for disease • helps to utilize genetic potential for growth and performance in later life
